

## UN Treaty Bodies Concluding Observations on Higher Education

**Prepared by Right to Education Initiative in July 2022** 

Treaty bodies are committees of independent experts created under a particular UN treaty. They are mandated to monitor how the states which have ratified the treaty in question comply with their obligations to implement the human rights guaranteed by the treaty, including the right to education. They periodically examine state reports and issue concluding observations on states' compliance with the treaty, including recommendations.

The UN Committee on Economic, Social and Cultural Rights (CESCR), the UN Committee on the Rights of the Child (CRC), the UN Committee on the Elimination of all forms of Discrimination Against Women (CEDAW), the UN Committee on the Rights of Persons with Disabilities (CRPD) and the UN Committee on Civil and Political Rights (CCPR) have covered issues related to higher education in their concluding observations. This document compiles their concerns and recommendations for the period 2016-2021. It is organised by UN treaty Bodies with states listed in alphabetical order.

## Short analysis of the content

The concluding observations across the different UN treaty bodies mainly refer to higher education in their section on the right to education. The committees highlight the disparities in access to higher education for disadvantaged, vulnerable and marginalised groups, particularly minorities such as Roma and migrants (CRC, CESCR), women and girls (CEDAW), and persons with disabilities (CRDP). This is evidenced by their underrepresentation in higher education establishments.

The Committees stress challenges at different levels: at the application and enrolment phase, during studies, and in the transition to the labour market. They raise concerns about the underrepresentation of certain groups as well as discriminations issues, both in access to higher education and in some fields of study. They question the content of education noting it is not always adapted to the labour markets, leaving students without jobs. They recommend the adoption of targeted and positive measures, stressing the need to allocate sufficient budget for the implementation of the right to higher education.

The Concluding Observations show that in some countries (Republic of Korea, Costa Rica, the UK, France, Romania, Barbuda, Saint Vincent and the Grenadines), there are no effective measures to ensure equal access to students from different social and economic backgrounds. In others (Bhutan, Senegal, Kiribati, Latvia, Eritrea, Qatar, New Zealand, Australia, Turkey), they show that women have more difficulties enrolling in programs and receiving higher education. They also face issues of accessing certain fields of study generally attributed to men (Haiti, Sweden, Ukraine, Romania, Montenegro, Germany, Singapore). In other states, persons with disabilities struggle to access higher education (Sudan, Oman, Latvia, Lithuania), including technical and vocational education with students sent to special schools. They also point out the lack of teachers training (UAE) and the challenges in accessing buildings and adapted learning material (Cuba, Greece, Albania, Philippines, Luxembourg, Panama, Montenegro).

The period of the studies itself is marked by high dropout rates, especially for students coming from disadvantaged economic and social backgrounds (migrants, Roma, Bahai students, Maori and Pasifika students) and women. The Committees therefore recommend states to adopt specific measures to ensure inclusion in higher education, by offering scholarships to students who cannot afford education, to set quotas for certain communities and women and to provide universities with more resources to support the integration of the underrepresented groups in higher education institutions.

The Committees underline that receiving higher education does not necessarily ensure transition to the labour market (e.g.: Lebanon) and recommend states to strengthen their vocational training programmes and to develop curricula that fit labour market needs.

While some issues seem to be present in most of the countries, the data presented does not give a full picture of the state of implementation of the right to higher education because the concluding observations mainly covered Europe. For instance, the Concluding Observations of the CESCR, between 2016 and 2021, mentioned the right to higher education nearly three times more in Europe than any other region. The main issue in Europe is the

underrepresentation of vulnerable, disadvantaged and marginalised groups (i.e., Roma, migrants). The Latin American region also faces the same issues (Dominican Republic, Costa Rica), but the review scale is more limited (only three mentions). Some highlight the difficulty in transitioning from higher education to the labour market (Lebanon, Slovakia).

More specifically, each Committee brought up some concerns specific to the treaty under their review (fig1).

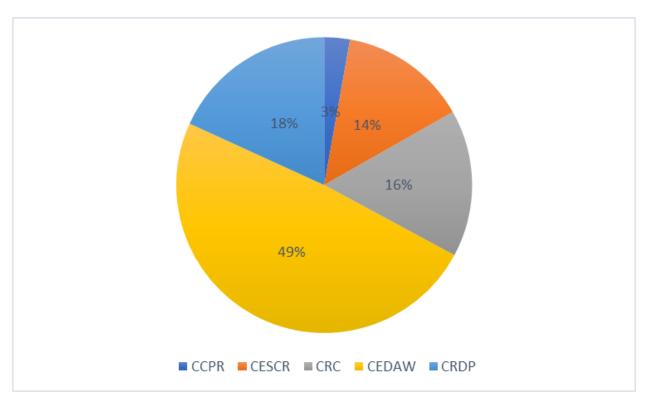

Fig 1. Percentage of concluding observations related to the right to higher education per treaty body for the period 2016-2021.

While the Committee on the Rights of the Child (CRC) mentions the right to higher education almost equally across Africa, Europe, and Latin America, the recommendations mainly concern discrimination and its impacts on limiting access to higher education for students from disadvantaged backgrounds (migrants, Roma). Armed conflict is brought up as a driver behind the same phenomenon in a more limited manner (Niger and Central African Republic), where education in higher education institutions stops being accessible when the latter are used by the armed forces.

The Committee on the Elimination of Discrimination against Women (CEDAW) is the committee that most mentions the right to higher education (see fig. 1). Asian and European countries are mentioned at least twice more than any other continent (Fig 2). CEDAW highlights that women are often underrepresented in higher education institutions (former Yugoslav Republic of Macedonia, Laos, New Zealand, Turkmenistan, Fiji, Luxembourg), and while this is improving in

some countries, they are still globally underrepresented in certain field of studies traditionally attributed to men (Cabo Verde, Seychelles, Qatar, Cyprus). The Committee also raised concerns about the underrepresentation of women in leadership positions at universities. Pregnant women and girls have additional struggles when it comes to access to higher education.

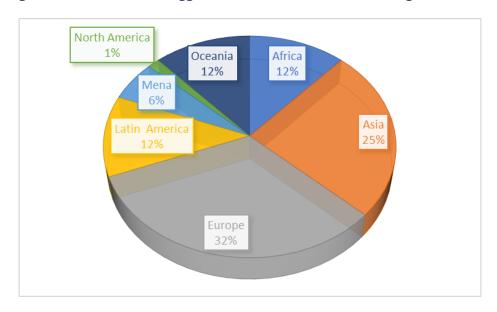

Fig. 2 CEDAW- Review of the implementation of the right to higher education by region

The Committee on the Rights of People with Disabilities brings up higher education issues mainly in the geographical context of Europe. It is mentioned at least five times more than in any other region. The Committee is concerned about physical access to higher education and recommends setting up infrastructure to make reasonable accommodation a reality (Chile, Armenia). The committee also brings up the need for teacher training for delivering knowledge to students with disabilities (UAE) which in some cases adds up to access issues (Serbia, Lithuania, Portugal) as presented by other Committees. The Committee stresses the need for sufficient budget allocation in order to implement these policies.

While the Committee notes the explanation given by the State party delegation that this legislation applies to all accredited universities in its territory, the Committee notes a lack of sufficient justification for the imposition of such constraints on freedom of thought, expression and association, as well as academic freedom. The Committee is concerned that the constraints particularly affect the Central European University because of its links with George Soros (arts. 18, 19, 21, 22 and 26). Lithuania	Discrimination against Roma 7. While noting the various programmes to improve the situation of the Roma community and the progress achieved in certain areas, in particular education and employment, the Committee is concerned at reports that the Roma community continues to suffer from widespread discrimination, especially in the areas of housing, health care, employment and education. In particular, it is concerned:  (b) at the persistent low literacy rates among Roma compared with the general population, the low percentage of Roma people with a general education and the decrease in the number of Roma people with secondary and higher education; (). The Committee regrets the lack of statistics on the number of complaints of discrimination against the Roma community and is concerned about the low number of investigations and lack of accountability for such acts (arts. 2, 24, 26 and 27). The Committee is concerned about the blanket ban on education in the West Bank imposed since 2014 on students from the Gaza Strip, which has limited their access to higher education in particular. It is also concerned at the serious impact of the dual-use list on the ability of students in the Gaza Strip to enjoy their right to education, particularly in the fields of science and engineering, and the benefits of scientific progress and its applications due to the lack of essential education materials and equipment (arts. 13 and 15).</li> </ul> </li> </ul>	E/C.12/ISR/CO/4 Para. 65, 66 12/11/2019	attack, access

Lebanon	Unemployment  30. The Committee notes the various measures taken by the State party to counter unemployment, including those aimed at supporting small and medium-sized enterprises. The Committee remains concerned, however, at the very high level of unemployment in the State party, especially among youth and women, including university graduates, which has been compounded by the arrival of refugees. Moreover, it is concerned that, even before the refugee crisis, the number of new jobs created annually was far lower than the number of youth entering the labour market. Therefore, the Committee is further concerned that the State party's policies and programmes targeting unemployment lack effectiveness (art. 6).  31. The Committee recommends that, in the formulation of an economic vision for the future, the State party:  (b) Review vocational and university programmes so that they meet current labour market demands and capitalize on the high level of education to ensure that it translates into job opportunities;	CESCR E/C.12/LBN/CO/2 Para. 30, 31 24/10/2016	Content of education, employment, women

New Zealand	Cultural rights  55. The Committee recommends () that opportunities to study in the local languages are provided in regions where the local languages are traditionally spoken, including at university level. The Committee reminds the State party of its general comment No. 21 (2009) on the right of everyone to take part in cultural life, in which it stated that education must be culturally appropriate and enable children to develop their personality and cultural identity, and to learn and understand the cultural values and practices of the communities to which they belong, as well as those of other communities and societies.  Right to Education  48. Despite the efforts made by the State party, the Committee is concerned about the persistence of disparities in the enjoyment of the right to education, whereby Māori and Pasifika students, notably at secondary school and university levels, achieve lower outcomes than those of European background and experience higher rates of stigma and disciplinary measures at	CESCR E/C.12/NZL/CO/4 Para. 48 1/05/2018	Discrimination, minorities, language
	schools. The Committee is particularly concerned at the limited availability of Māori, or Māori-speaking, teachers, limiting even further access to education in Māori language.		
Republic of Korea	Equal access to quality education 64. The Committee recommends that the State party take effective measures to ensure equal access to affordable and quality education, taking into account the special needs of disadvantaged and marginalized individuals. In particular, it recommends that the State party:  (b) Revise the secondary and tertiary education entrance systems to ensure equal access for all on the basis of capacity;	CESCR E/C.12/KOR/CO/4 Para. 64 19/10/2017	Discrimination, access, disadvantaged and marginalised groups
Slovakia	Tertiary education and upper secondary vocational programmes  54. While noting several positive steps, including the high participation rate in upper-secondary vocational programmes, the facilitation of internships, the introduction of dedicated career counselling services and the increase in the number of young adults with tertiary education, the Committee is concerned that tertiary education in the State party is not sufficiently related to the requirements of the labour market and thus tertiary-educated young adults have more difficulties transitioning into employment than their elders (arts. 6 and 13 (1)–(2)). The Committee recommends that the State party take measures to ensure that students below the age of 18 years at higher military educational institutions are exempt from military training that involves the handling of firearms and military discipline.
